

AIRpipe for Food

Case Study August 2009

In 2007, Cadbury had initiated the “Purple Goes Green” campaign in its efforts to cut its CO2 emission levels by 2020. With the help of a local distributor, AIRpipe is able to assist Cadbury with an eco-friendly 100% recyclable compressed air & gas system. The leak free performance has also proven to decrease energy costs and increase savings.

The System:

- 150 mm (6")
- 80 mm (3")
- 50 mm (2")

Advancing Compressed Air & Gas Systems
